

TravelNetCon-Hotspot-System

TNC General Information

What is TravelNetCon (TNC)?

TNC is a GLOBAL NETWORK of WiFi hotspots where TNC clients (customer) can connect to the internet with any WiFi notebook, or other properly equipped mobile device. The TNC client is expected to purchase through a secure bank transaction a certain value of TNC CREDITS and these can be used anywhere within the TNC network until all CREDITS are used up. In other words, the TNC client decides when and where he will use the purchased CREDITS which will be subtracted from client's personal account in one minute intervals until they are all used up.

Why Join TravelNetCon Global?

Fair Market Price – Lowest price on the International Market. Our competition will charge on average 5 EUR/hour. The average price of TNC Global is 2 EUR/hour for internet connection.

Fair Conditions of Use – With TNC you don't ever lose a single minute of your credit.

Simple and Transparent Accounting – You only get charged for what you use.

No Roving Charges and no additional charges anywhere in the world.

One Minute Intervals – Only pay for what you use.

State of the Art Network – Safe, Secure, Stable.

Accurate, up to date and easy to find information about TNCspots(TravelNetCon-HotSpot) – you can select and use the TNCspot which suits you the best.

Active monitoring of each TNCspot 24 hours a day, 7 days a week to ensure the highest level of reliability.

We are the fastest growing network of TNCspots(TravelNetCon-HotSpot) in the world today.

How can clients (customers) join the TNC world wide network?

The TNC client will register on www.travelnetcon.com web site using his user name and password following simple instructions. Then, the TNC client will read the "*TNC Customer Agreement*" on the TNC web site and by clicking on the "YES" box the registration is complete.

Following registration will the TNC client purchase a minimum of 10 TNC CREDITS using a secure https:// bank transaction posted on the TNC web site. An e-mail message from TNC will officially confirm the client's registration and financial transaction status.

Using his registration data – user name and password – the TNC client can connect to the Internet at any TNC licensed hotspot operator (TNCspot) world wide. The connection time will be subtracted from the client's credit in one minute intervals and the client can check the status of his credit in the monthly statement at his personal account. The remaining portion of the credit can be used anywhere in the TNC network at any time until the purchased credits will last.

Should the client have any problems please contact our 24 hour customer care service at www.travelnetcon.com.

What is the price of Internet connection in the TNC Global Network?

The price of Internet connection is determined by the market, although TNC will recommend a maximum rate for connectivity at 2 EUR/hour. In spite of TNC recommended maximum price for connectivity, the specific TNCspot operator will determine the hourly price of connectivity and this information will be provided on the map of TNCspot operators with the connectivity price and quality indicators. Using this information, the TNC client will determine which TNCspot he will use to connect to the Internet and how much he will pay for the time he is connected.

How do I find a TNCspot(TravelNetCon-HotSpot)?

There are thousands of TNCspots world wide in hotels, cafes, train, bus and gas stations, sea ports and air ports, at most usual as well as unusual locations. The simplest way to find a TNCspot is to look up the country and the city you plan to visit on the TNC Map. There you will see not only the available TNC locations, but the site will provide also the quality and pricing information at the specific location.

Can I access the TNC Network(TravelNetCon HotSpot-Network) internationally?

Yes. The pre purchased TNC credits enable you to access the TNC Global Network at all TNCspot locations world wide. You pay no additional roaming, or administrative fees, only the portion of TNC credits stated by the specific TNCspot operator on the TNC Map.

Does the TNC network support streaming video, video conferences or VoIP?

Yes. The TNC Global is a modern, state of the art, stable, safe, secure and robust network of wireless Internet locations which provide a convenient and high quality Internet service to all TNC clients (customers) worldwide.
